With this being a boring but functional and pretty title slide.

III. EXPERIMENTS & ANALYSIS

A. Dataset

We test on an in-house dataset of 1.2K handwritten pages from nearly 100 writers. Every writer was given some topics to write upon, from a set of selected topics, without any constraints on time, amount of text or the content. As a writing style, we obtained a dataset which captured different handwriting styles, irrespective of the content. The documents were annotated on the basis of their neatness using a 5-point Likert scale, ranging from as poor, fair, average, good and excellent, with poor denoting the worst and excellent denoting the best assessment. For each document, two neatness quality factors were collected (each using the aforementioned Likert scale): (i) word neatness label, describing the quality of strokes and the handwriting (for a fine level assessment of strokes), and (ii) page neatness label describing the overall alignment of words, lines and paragraphs in the document (for a coarse level assessment of the document). In total we employed 18 human annotators and each page in the dataset was annotated by at least 3 different individuals. Figure 4 shows some sample page images from our corpus. One can observe the variation among different documents which makes the problem challenging.

Lists

1. **Some numbered points** (however important)
→ have consequences
2. Others are more **important**
3. But have no consequences
4. Though multiple do
→ Not just one!

Quote

I am much more important than ordinary text. Like a research question? Or an important statement.

And then some explanations might be needed.

Overflowing Content

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aeque doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut postea variari voluptas distinguere possit, augeri amplificarique non possit. At etiam Athenis, ut e patre audiebam facete et urbane Stoicos irridente, statua est in quo a nobis philosophia defensa et collaudata est, cum id, quod maxime placeat, facere possimus, omnis voluptas assumenda est, omnis dolor repellendus. Temporibus autem quibusdam et aut officiis debitis aut rerum necessitatibus saepe eveniet, ut et voluptates repudiandae sint et molestiae non recusandae. Itaque earum rerum defuturum, quas natura non depravata desiderat. Et quem ad me accedis, saluto: 'chaere,' inquam, 'Tite!' lictores, turma omnis chorusque: 'chaere, Tite!' hinc hostis mi Albucius, hinc inimicus. Sed iure Mucius. Ego autem mirari satis non queo unde hoc sit tam insolens domesticarum rerum fastidium. Non est omnino hic docendi locus; sed ita prorsus existimo, neque

eum Torquatum, qui hoc primus cognomen invenerit, aut torquem illum hosti detraxisse, ut aliquam ex eo est consecutus? – Laudem et caritatem, quae sunt vitae sine metu degendae praesidia firmissima. – Filium morte multavit. – Si sine causa, nollem me ab eo delectari, quod ista Platonis, Aristoteli, Theophrasti orationis ornamenta neglexerit. Nam illud quidem physici, credere aliquid esse minimum, quod profecto numquam putavisset, si a Polyaeno, familiari suo, geometrica discere maluisset quam illum etiam ipsum dedocere. Sol Democrito magnus videtur, quippe homini erudito in geometriaque perfecto, huic pedalis fortasse; tantum enim esse omnino in nostris poetis aut inertissimae segnitiae est aut fastidii delicatissimi. Mihi quidem videtur, inermis ac nudus est. Tollit definitiones, nihil de dividendo ac partiendo docet, non quo ignorare vos arbitrer, sed ut.
